

Treat clients or customers with Vouchers

In a changing era, businesses need innovative ways to connect with their audiences. Vouchers can help you increase foot traffic, drive new or repeat online sales, add to your rewards program, or improve the overall customer experience.

Why use Vouchers?

Control costs

Pay as you go. With Vouchers, you only pay for what gets used. By customizing cost parameters—campaign timing, location, spending caps, and more—you maintain both flexibility and control.

Create, send, and monitor with ease

Make and distribute vouchers from one dashboard while getting real-time reporting on use and cost. Recipients claim and redeem their vouchers for immediate or later use right in the Uber or Uber Eats mobile app.

Surprise and delight

Show your customers or clients that you appreciate them. The possibilities with Vouchers are endless—incentivize high-value purchases, uplevel virtual events, give perks to loyal customers, or provide rides to prospective clients.
